

Principal Engineer

Interwest Consulting Group was founded in 2002 and has become a leader in providing municipal services to cities and counties throughout the Western United States. We currently have over 280 employees specializing in public works, building and safety, real estate acquisition, information technology and geographic information systems. In our fourteen years, we have attracted the best in our professions and are positioned for continued growth and success.

We are seeking an experienced and motivated **Principal Engineer**, registered in the State of California, with a minimum of five years experience performing various public works tasks within and for municipalities. This is an exceptional opportunity to become a key member of our highly qualified, collaborative and motivated public works team.

Locations:

- San Francisco Bay Area
- Sacramento Region

Typical Work Performed

Our Principal Engineer will serve in a variety of capacities including overseeing and managing client contracts, performing a variety of technical and administrative functions, and serving in executive management positions for our public agency clients. This includes providing technical assistance and support to City Managers, elected officials, and community and business stakeholders on public works programs, policies, activities, and projects. This may also include representing our public agency clients on regional governance issues relating to transportation, storm water management, solid waste, and air quality.

Typical work would include:

- Preparing written reports and make presentations to the City Manager, City Council, and community groups
- Provide technical assistance and recommendations on matters relating to municipal engineering including civil, transportation, traffic, water resources, and public works operations and maintenance
- Attend meetings on behalf of public agencies, participate in regional discussions on behalf of public agency clients, and provide technical recommendations on regional policy issues
- Review various project entitlement applications such as Tentative Maps, Site Development Reviews, and develop conditions of approval
- Review parcel maps, final maps, improvement plans, and grading plans for conformance with City and State regulations and engineering standards of practice, including ADA and accessibility requirements
- Project manage the delivery of capital improvement projects including the development of RFP's, selecting and negotiations of consultant contracts, and managing consultant work and products
- Assist cities in the evaluation and creation of short and long range infrastructure planning, organizational assessments and performance, and mentoring and improvement of staff

Interwest offers highly competitive salaries and a generous benefits package to include health insurance, 401(k), life insurance, long term disability, holidays and paid time off.
