

Senior Engineer

Interwest Consulting Group was founded in 2002 and has become a leader in providing municipal services to cities and counties throughout the Western United States. We currently have over 280 employees specializing in public works, building and safety, real estate acquisition, information technology and geographic information systems. In our fourteen years, we have attracted the best in our professions and are positioned for continued growth and success.

We are seeking an experienced and motivated **Senior Engineer**, registered in the State of California, with a minimum of five years experience performing various public works tasks within and for municipalities. This is an exceptional opportunity to become a key member of our highly qualified, collaborative and motivated public works team.

Locations:

- San Francisco Bay Area
- Sacramento Region
- Central Valley

Typical Work Performed

Senior Engineer will perform project management and coordination of a variety of public works projects for our public agency clients. Working under general supervision, this position will be expected to independently complete municipal engineering assignments requiring good judgment, initiative, and good communication skills.

Desirable background and experience includes:

- Serve as Engineering Project Manager and Primary Engineering Reviewer for a wide variety of land development and subdivision applications.
- Review and manage multiple land development and subdivision applications from initial planning entitlement through improvement plan and final map approval, construction and final sign-off of improvements.
- Review parcel maps, final maps, tract improvement plans, grading plans, street improvement plans, plot plans and building permit plans for conformance with published City and State regulations and engineering standards of practice, including ADA and accessibility requirements.
- Review plans for conformance with the requirements of the RWQCB NDPES Municipal Regional Permit (MRP), including but not limited to: Low Impact Development, design of storm water treatment measures and sizing calculations, hydromodification standards and the use of BAHM software to both design and review detention and metering devices.
- Preparation of agreements including long term encroachment agreements and subdivision improvement agreements.
- Review and provide comments on environmental documents and permits for projects.
- Solicit proposals for capital improvement project design work and manage the consultant's work. Directing other contract engineering services to assure compatible and timely response to City needs.
- Preparing reports, investigations, studies and evaluations as may be required.
- Uses a team oriented approach and works cooperatively and collaboratively with others.

Interwest offers highly competitive salaries and a generous benefits package to include health insurance, 401(k), life insurance, long term disability, holidays and paid time off.
